Part II, Section B.1 – Operation Description (Use in Product Formulation)

Products containing the notified substance are intended for use [REDACTED]
[REDACTED]
[REDACTED]

Specific formulation operations will vary between customers and are generally speaking, proprietary formulations. All formulators are instructed to follow handling, PPE, storage, and disposal procedures as outlined in the SDS. Minimal release to the environment is anticipated as it is stated in the SDS (attached) to prevent release of large quantities of the notified substance into surface water or into drains.
